S U P P L Y

Before you buy, can your rig builder answer yes to...

1. Does the rig appear professional and well designed?
2. Does the rig have an H.I.T. refrigerated air dryer to cool air and prevent moisture in your air lines?
3. Is the foam rig insulated?
4. Is the spray foam rig at least 7'8" in height to allow easy pump removal and material handling?
5. Does the the spray foam rig have an all-inclusive source for warranty and support?
6. Is the foam rig constructed with 8-inch double I-beams and support studs on 16-inch centers for rigid, lasting durability?
7. Will you have a proper work and storage area in the new rig?
8. Is the equipment in the rig secured and fastened down to withstand all driving conditions?
9. Has the rig been engineered with properly rated, dual axle support for the handling of selected equipment and materials?
10. Does the rig have a closeable hose door?
11. Has the rig been designed and tested to ensure a safe and smooth tow?
12. Do you have a breakaway brake equipped on the rig?
13. Are the key equipment components on the rig manufactured by industry leaders?
14. Does the spray foam rig have a ramp door for easy material access?
