SPRAY FOAM RIG

PARATUS
S U P P L Y

SUPERIOR CRAFTSMANSHIP

The foam rigs we build at Paratus are built to the highest possible levels of quality. Each rig undergoes a 50-point check before being handed off to a customer that ensures the rig is built to spec and contains unmatched levels of quality and craftsmanship.

PREMIUM TECHNOLOGY

Inside the XTR1s spray foam rig you will find the best equipment, parts, and components throughout. We do not sacrifice anything when it comes to our rigs. Polymac foam equipment, 220V shore power, and many more high-end components are found throughout the XTR1s.

TOP-LEVEL PERFORMANCE

Boundaries will be pushed, expectations will be exceeded with the XTR1s from Paratus. Paratus has engineered a hydraulic spray foam rig, complete with all of the components that define reliability, and we have done it a 12' V-nose shell with a price that is hard to find elsewhere.
