

# XTR2

SPRAY FOAM RIG

**PARATUS**  
S U P P L Y

## SUPERIOR CRAFTSMANSHIP

The foam rigs we build at Paratus are built to the highest possible levels of quality. Each rig undergoes a 50-point check before being handed off to a customer that ensures the rig is built to spec and contains unmatched levels of quality and craftsmanship.

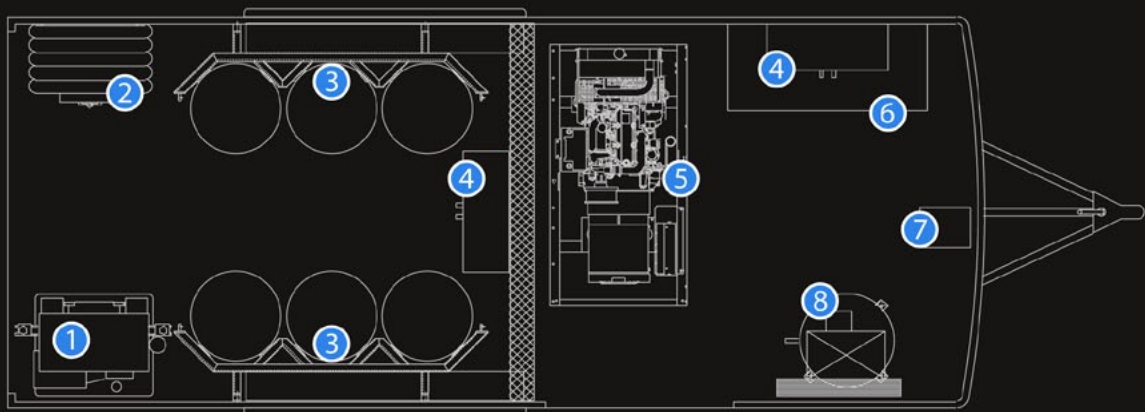

## PREMIUM TECHNOLOGY

Inside the XTR2 spray foam rig you will find the best equipment, parts, and components throughout. We do not sacrifice anything when it comes to our rigs. Polymac foam equipment, premium generators, and many more high-end components are found throughout the XTR2.

## TOP-LEVEL PERFORMANCE

The XTR2 is built to exceed what you might have come to expect from most spray foam rigs. This rig allows you to carry three sets of chemical, use the highest level foam machines, and use up to 410' of heated hose all inside a 20' tag-a-long shell.
